

Technical Data Sheet

PRILLED UREA

Agriculture

Prilled urea is a type of solid nitrogen fertilizer that easily dissolves in water. Granular urea is a type of solid nitrogen fertilizer that comes in the form of granules. Prilled urea dissolves quickly in water. This is because prilled urea has a high dimensional consistency and a small size.

Application:

- Fertilizer
- Animal feed additives

Property	Units	Test Method	Value
Nitrogen Content	wt%	ISO 5315	46.3min
MOISTURE	wt%	ISO 2753	0.3max
BIURET CONTENT	wt%	ISO 2754	1.0 max
PARTICLE SIZE (1-2.84mm)	%	ISO 8397	90 min
Conditioning Agent	Anti-Cake or Formaldehyde Treated
