Arena Code: AS10408/ASPC-LFI 2125A

Producer and Supplier in the fields of Chemical, Oil, Gas and Petrochemical industries

Technical Data Sheet

LFI 2125A

Low Density Polyethylene

LFI2125A is a low density polyethylene, with a medium level of anti-block and slip agent (Erucamide). This grade offers good optical properties, low energy consumption during processing, adequate COF level and excellent draw down. LFI2125A has been manufactured under SABTEC licensed technology.

Applications:

Blown film extrusion, packaging film for food and goods, general lamination film

Recommended Process Conditions ⁴			
Extruder Temperature profile: 170-190 °C Blo	ow up ratio: 2-3		

- 1. Typical values: these are not to be construed as specifications.
- 2. The density parameter was determined on compression-molded specimens, which were prepared in accordance with procedure C of ASTM D4703, Annex A1.
- 3. Properties are based on 25 μm blown film produced at a melt temperature of 165°C and 3 BUR using 100% LFI2125A
- 4. Please note that, these processing conditions are recommended by producer only for 100% LFI2125A resin (not in the case of blending with any other compatible material), but because of the many particular factors which are outside our knowledge and control, and may affect the use of product, no warranty is given for the foregoing data.
