## **Technical Data Sheet**

## F4000

## **Expandable Polystyrene**

F-4000 is an expandable polystyrene (EPS) resin which contains pentane gas as foam blowing agent and the cycloaliphatic brominated hydrocarbon as its flame retardant agent.

This grade exhibits outstanding expansion, insulation, moisture proofing and mechanical load bearing properties.

## **Applications:**

Rigid insulation boards, panel applications, Low density housing and construction blocks, Civil Engineering. Flame Retardant series are suitable for self-extinguishing applications where the oxygen index is potentially high.
