Technical Data Sheet

HP 552R

Polypropylene Homopolymer

HP552R is a high melt flow homo-polymer polypropylene for the production of CF, BCF and staple fibres at medium to high spinning speeds. HP552R with an excellent anti-gas fading package offers a high homogeneity, stable extrusion and excellent process ability on both short and long spinning lines. This grade allows a high stretch ratio and gives tough and resilient fibres.

Applications:

HP552R is suitable for low denier staple fibres for non-woven fabrics, diapers, medical-sanitary applications and wipes. Another typical application is high tenacity continues filament for straps for backpacks, handles for big and safety belts.

Continues filament with medium tenacity is used for upholstery, sportswear and heavy duty clothing. HP552R is also suited for the production of bulked continues filament for thermo bonding and carpets HP552R is suitable for food contact.
